

LOT Winter School 2026

Feedback from students

Francis Bond

Response: N = 6

Scale: poor (1) – excellent (10)

How would you rate the overall quality of the course? 8.67

How would you rate the didactic skills of the teacher? 9.00

Course Contents:

Scale: Strongly disagree (1) – strongly agree (10)

<i>The course was useful in developing my knowledge and skills on the course topic.</i>	9.50
<i>The instructor presented course material in a clear manner that facilitated understanding.</i>	9.12
<i>The instructor stimulated my interest in the subject matter.</i>	8.83
<i>The instructor created a welcoming and inclusive learning environment.</i>	8.67
<i>I was satisfied with the workload in relation to the number of ECTS.</i>	8.40

Scale: Too easy (1) – too challenging (10)

This course was...	6.00
--------------------	------

List one thing the instructor should start doing.

- Upload the reading material a little earlier :)
- Think of ways to induce more interactivity in the course. Perhaps in the form of (sub)group discussions or in-class assignments, or other ways to stimulate active engagement with the material.
- Ensure everyone has Python or Colab set up and ready before we start coding in class. It can be intimidating for beginners to start coding without a platform, especially when it's not yet configured.
- Maybe he can mention that laptops can be closed till the coding part begins? I felt that a lot of the students were just on their laptops and not paying attention during the core content part, which made me sad.

List one thing the instructor should stop doing.

- Swap out the Python REPL for an interactive notebook. It'd make it so much easier for us all to read along, especially with if/for block indentation.

List one thing the instructor should continue doing.

- Hands-on exercises with wordnet
- I found the presentation style of the instructor easy, well-structured and pleasant to follow.
- Keep using examples; I think they make the concepts you explain more memorable! I also like that you bring in your real-life experiences with languages; they are very entertaining.

Do you have anything else you'd like to share about this course or this teacher?

- The reading was only sent to us a day beforehand, and due to commuting time the entire week I was not able to do a lot of catching up in terms of the reading. I felt like I could follow along fine without it, though.
- I agree with a point raised in the last class that (simple) Python notebooks would have been useful for every class. I am not very confident with programming but I would have liked to experiment more with simple applications of Wordnet and other practical methods that came up in class (beyond the demonstration in class because that was sometimes difficult to follow/copy and run myself).
- You are an excellent lecturer. You present ideas very clearly and well-organised, your tone of voice is very pleasant. You're the type of lecturer I seek out on YouTube to learn from.
